**Connecting Communities  
Reducing Emissions  
Protecting Lake Tahoe**

The Tahoe Transportation District (TTD) is committed to providing clean and sustainable transportation solutions for the Lake Tahoe area. In the past three years, TTD competed for, and was awarded three consecutive years of, Low or No Emission federal grants to support Clean Transit.

TTD's Clean Transit Initiative is focused on improving fleet reliability, reducing greenhouse gas emissions in the Lake Tahoe Basin, providing a clean and quiet solution for neighborhood transit, and reducing operating costs while helping TTD comply with the California Air Resources Board's Innovative Clean Transit rule years before it is required.

## Clean Transit Initiative by the numbers

**3** Proterra Battery Electric Buses

**4** Phoenix Motorcars Battery Electric Cutaway Buses

**60 kW Proterra Pedestal, Overnight Chargers** **2**

**500 kW Proterra Overhead, Fast Chargers** **2**

**ClipperCreek Plug-In Chargers** **4**

Charge time at overhead chargers

**10**  
**Minutes**

**9** Estimated Months Until Deployment

The Lake Tahoe Community College (LTCC) Mobility Hub project includes two 500 kW overhead, fast chargers—the first of their kind nationwide—to accommodate a 10-minute quick-charge for two Proterra buses along with two 60 kW pedestal, overnight chargers at two newly constructed shelters with passenger amenities including heated ADA-accessible sidewalks, bicycle storage and maintenance station, and passenger notification screens.

**LTCC Mobility Hub Project**

The project was developed through a strategic partnership with TTD, LTCC District, and Liberty Utilities.
